

Concrete casting

- Length 2500 mm
- Width 1000 mm
- Thickness 120-150 mm

1 pcs. of equipment on 1 concrete

Ground frost insulation

Ground frost insulation

Rebaring

- Length 2300-2400 mm
- Width 800-900 mm
- Thickness 6-12 mm
- Mesh Size 150-200 mm

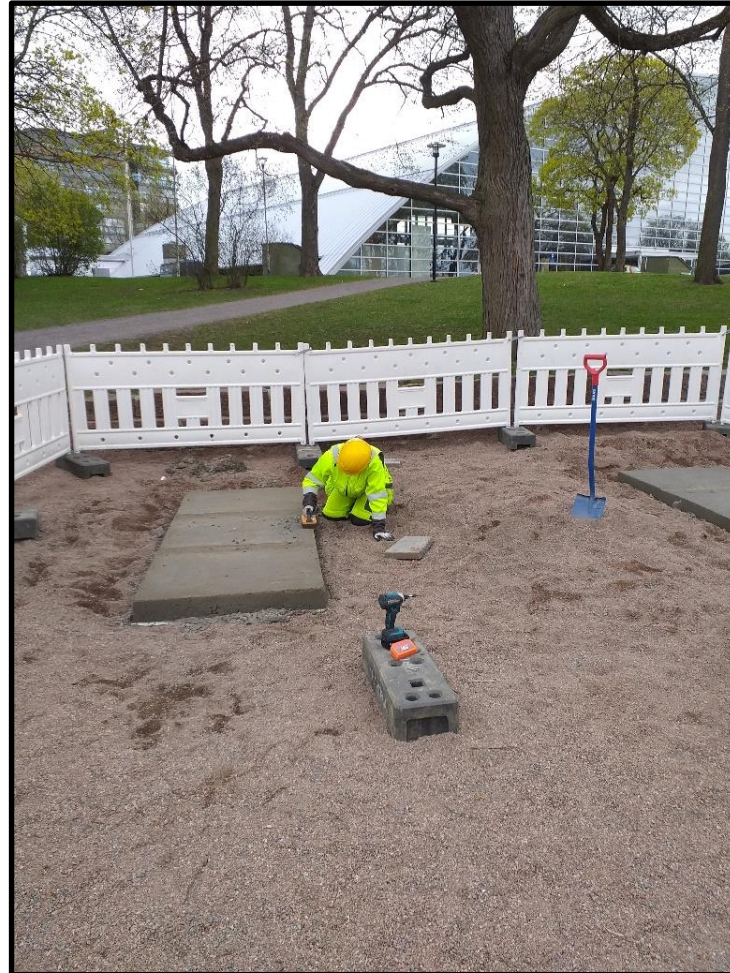

Concrete casting

IMPORTANT: Secure that the concrete is horizontally

- Length 2500 mm
- Width 1000 mm
- Thickness 120-150 mm

Adequate drying time

Finishing the smoothness

Assembly

IMPORTANT: Secure that the concrete is horizontally

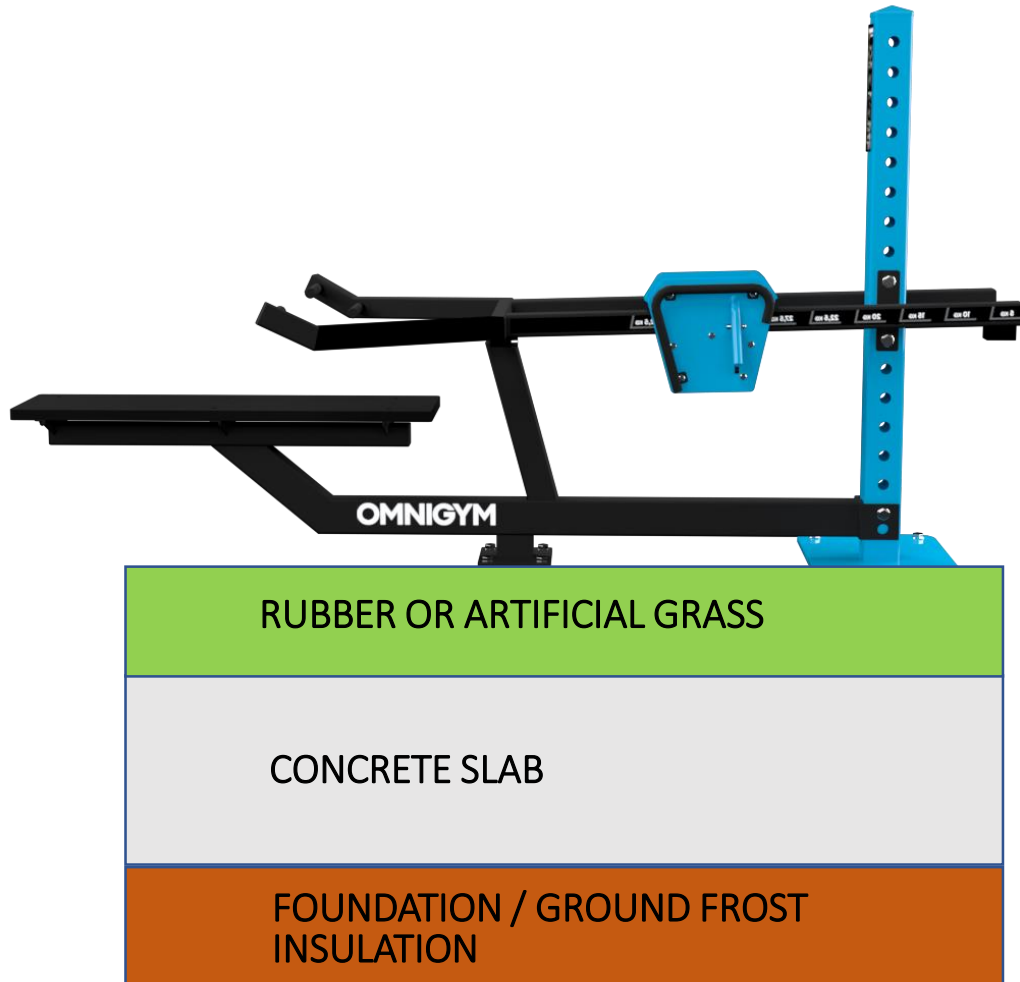

Mounting the Post

IMPORTANT: Secure that the post is vertically before mounting the post

Concrete slab, installation and surface material thickness

Foundation:

Ground frost insulation allowing water penetration, compacted and leveled stone dust on the surface on which the concrete layer shall be made in a horizontal plane.

Surface material thickness max. 20mm

Concrete thickness 120-150 mm.

FOUNDATION / GROUND FROST INSULATION
